CARTS

“Big Boom” Sound System

This is our big sound system on a cart. The unit is often used at large events such as Rally in the Valley. We offer the stands for the speaker units if noted.

Projector Cart

Carts come equipped with wi-fi enabled computer, projector, and speakers. Carts are highly mobile and can be outfitted to request.

TV Cart

This comes equipped with a DVD player and VHS deck.

Video

Document Camera

This USB document camera provides live image capture for documents, pictures, textbooks, and three-dimensional objects.

Flip Video Camera

The Flip Cams are great for field trips and taking quick video clips for documentation. The cameras produce a mid quality video and do not take stills.

Over Head Projector

These projectors are a traditional projection system using transparency sheets.

Projection Screen

The screens are used with over head projectors and video projection when a projection surface is unavailable.

Still Camera

We carry no analog cameras, all are digital. They have the capability of taking small low quality video clips, but are best for taking print quality images.

Tripod

Recommended accessory for any one taking pictures for print, or video for an important end product.

Video Camera

These cameras produce a higher quality of sound and video. We also offer many accessories to enhance the quality of the video's end product.

Web Cam

The intended use of this equipment is with Google chat, Skype, and other applications promoting video

conferencing. The unit can also be used record video and audio from the work station.

AUDIO

Audio Recorder

These are great for creating an audio record of an interview, lecture, or conference.

Boom Box CD / Cassette

These units offer sound for the class room needing radio, CD, or Cassette support.

Headset w/Mic, 5 pack

A convenient set of five microphone enabled headsets for recording and listening.

Headset w/Mic, 10 pack

A convenient set of ten microphone enabled headsets for recording and listening.

“Little Boom” Sound System

This smaller sound system packs a punch. Great for functions of 100 to 150 viewers and larger rooms like the small gym and cafeteria.

EXTRAS

Flash Drives

These new 8GB units are capable of supporting large amounts of storage for small independent video projects. They still support data for everyday storage too.

Laser Presenter Remotes

The remotes control the transitions of a presentation, and provide a laser for identifying key elements on screen.

Media card Reader

These card readers will take most standard media storage chips; from digital cameras to cell phones and provide a means to transfer data to the computer in the absence of the USB cord.

Red Title = Staff and faculty can loan for the duration of a course.

Orange Title = Staff and faculty can store equipment for use for duration of a course, but must realize that said equipment may be signed out to another teacher occasionally.
