WORD OF THE DAY: Weald

1. A heavily wooded area: forest
2. A wild or uncultivated usually upland region

If *weald* were a tree, it would have many annual rings. It has been in use as a general word for "forest" since the days of Old English, and it has also long been used, in its capitalized form, as a geographic name for a once-heavily forested region of southeast England. *Weald* is also often capitalized today when used to refer to wooded areas like the Weald of Kent and the Weald of Sussex in England. In time, the word branched out to designate any wild and uncultivated upland regions. A related word is *wold*, meaning "an upland plain or stretch of rolling land."
