WORD OF THE DAY: Lexicographer

An author or editor of a dictionary

Today, we're looking at a word that is dear to our hearts: *lexicographer*. The ancient Greeks were some of the earliest makers of dictionaries; they used them mainly to catalog obsolete terms from their rich literary past. To create a word for writers of dictionaries, the Greeks sensibly attached the suffix - *graphos*, meaning "writer," to *lexikon*, meaning "dictionary," to form *lexikographos*, the direct ancestor of the English word *lexicographer*. *Lexikon*, which itself descends from Greek *lexis* (meaning "word" or "speech"), also gave us *lexicon*, which can mean either "dictionary" or "the vocabulary of a language, speaker, or subject."
